Additional Details

Driving licence

Carlos Nicolás

Software Engineer

Work Experience

Full-Stack Developer

Eurotransportcar, S.L. | July 2026 - September 2026

- Developed web applications using HTML, JavaScript, CSS, Bootstrap and PHP.
- Created REST APIs.
- Used Docker during the internship.

Education

Bachelor's Degree in Computer Engineering - Specialisation in Software Engineering

University of Córdoba | 2022 - Present
Expected to graduate this year.

Personal Projects

Client-Server Blackjack | C++

- Developed a Blackjack game with client-server communication using sockets and TCP.
- Applied concepts from the TCP/IP layered model.
- Used CMake to build the project.

n8n Deployment on a VPS | Docker

- Installed and deployed an n8n instance on a VPS using Docker.

Algorithms and Programming | CodinGame

- Practised solving algorithmic problems.
- Used classes and data structures in C++.

Technical Skills

- **Languages:** C, C++, Python, JavaScript and PHP.
- **Web development:** HTML, CSS, Bootstrap and REST APIs.
- **Programming:** algorithms, data structures and object-oriented programming.
- **Networking:** sockets, TCP and the TCP/IP model.
- **Tools and environments:** CMake, Docker, n8n and VPS hosting.

Soft Skills

- Proactive
- Outgoing
- Teamwork experience gained during my degree and internship.
